

Application Overview

Livet mobile is an application where Livet Hospital patients can check their previous appointments indications, the date and time for their next appointments and their clinical history.

This application was developed by a group of students from Escuela Superior Politécnica del Litoral (ESPOL) as a project from the Software Engineering II

System Summary

This section explains about hardware and software requirements for the application, and about how to login.

Hardware and software requirements

This application requires a smartphone with Android operating system.

The minimum Android version should be 4.1.x or higher.

The smartphone must have an internet connection to download the application.

User access

To login in the application, you must be a patient at Livet Hospital, in that case your username and password will be given by a secretary after your first appointment at the hospital.

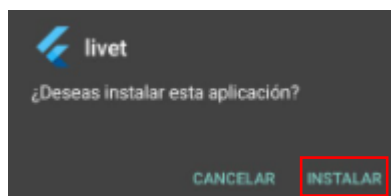

How to download and install the app

Livet mobile can be installed by an apk sent to you, either by email or SMS. Once you received the apk follow these steps to install it:

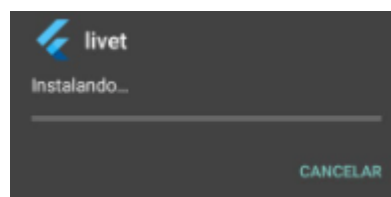

1. Once you have downloaded the apk go to the folder where it's stored and tap "livet.apk"

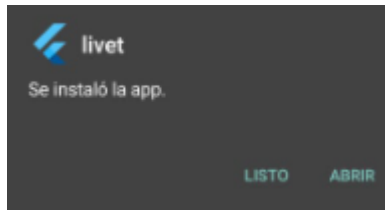

2. A menu will pop on your screen asking if you want to install this app, select install

3. A new menu will pop where you can see an installation progress bar

4. Once its finished, the following menu will display a message confirming the app was successfully installed.

Inside the application

The first screen you will see is the login screen, to login into the application you need to use the credentials given to you after your first appointment.

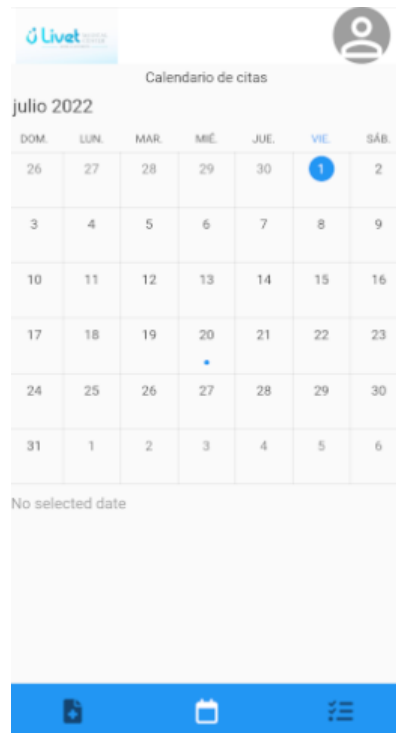

If the login is sucessful you will see three different screens:

- The first one will show your clinical history

- The second one will show a calendar where you will see all your previous and next appointments

- Finally, the last screen will show your indications and recommendations given by the doctor of all your previous appointments.
